Fetching the export status ended successfully							
Example:							

```
{
  "data": {
    "attributes": {
      "created": "2024-11-25T10:13:42.470Z",
      "formats": [
        "csv"
      ],
      "status": "PENDING"
    },
    "id": "d6b640e5-d88c-4c17-9bf0-93597b7a1ce2",
    "type": "resource"
  },
  "jsonapi": {
    "version": "1.0"
  },
  "links": {
    "self": "/orgs/825e79b7-0073-44c3-a5ea-e0aa8a3dbf38/export/4d593250-aaf3-48ec"
  }
}
```

## Headers

Name	Type	Description
content-location	String	A URL for the location of a resource
deprecation	String	The deprecation date of the underlying endpoint. For more information, please refer to the deprecation header RFC: <a href="https://tools.ietf.org/id/draft-dalal-deprecation-header-01.html">https://tools.ietf.org/id/draft-dalal-deprecation-header-01.html</a>
snyk-request-id	String	A unique id used for tracking this request. If you are reporting an issue to Snyk it's very helpful to provide this ID
snyk-version-lifecycle-stage	String	The version stage of the endpoint. This stage describes the guarantees snyk provides surrounding stability of the endpoint
snyk-version-requested	String	The version of the endpoint requested by the caller
snyk-version-served	String	The version of the endpoint that was served by the API
sunset	String	The date of when the underlying endpoint will be removed. This header is only present if the endpoint has been deprecated. Please refer to the RFC for more information: <a href="https://datatracker.ietf.org/doc/html/rfc8594">https://datatracker.ietf.org/doc/html/rfc8594</a>

POST Initiate export (org)

GET Fetch export results (org)
